

Investment Option Document

Purpose

This document provides you with key information about this investment option linked to our Savings Unit-Linked Plan. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this fund and to help you compare it with other products. You are advised to read it so you can make an informed decision if you wish to invest in this fund. This document should be read alongside the Savings Unit-Linked Plan Key Information Document.

Type of Investment Option

Investment Option:	Black Rock Euro Corporate Bond Fund	Managed by:	BlackRock (Luxembourg) S.A
ISIN:	LU0162658883	Date:	30 June 2020
Fund Base Currency:	Euro		

You are about to purchase a product that is not simple and may be difficult to understand.

What is this Investment Option?

Type
The Black Rock Euro Corporate Bond Fund is a sub-fund of BlackRock Global Funds, an umbrella structure comprising different sub-funds. Under Luxembourg law, BGF has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within BGF). In addition, the Fund's assets are held separately from the assets of other sub-funds.

Objectives
The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets. The Fund invests at least 70% of its total assets in fixed income securities which are denominated in euro.

Investment Policy
To achieve its objective, at least 70% of the Fund's total assets will be issued by companies whether domiciled in countries inside or outside of the Eurozone and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of purchase. The remainder may include investments with a relatively low credit rating or which are unrated.

The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). The IA has discretion to select the Fund's investments and in doing so may take into consideration the BofA Merrill Lynch Euro Corporate Index. The shares will be non-distributing (i.e. dividend income will be included in their value). The shares will be denominated in Euro, the Fund's base currency.

Intended Retail Investor
The Fund aims to meet the needs of all types of investors who are looking for capital growth or income with a medium to long term investment time horizon, i.e. they should plan to hold the Fund for at least ten years. The Fund is designed for use either as part of a diversified investment portfolio or as sole diversified investment providing access to the asset class. Investors buying the Fund need to have an understanding about investing in Funds. Investors should be prepared to bear losses since the Fund is not guaranteed and can also be subject to sharp fluctuations and cycles in value typically associated with these investments and therefore may receive back less than the amount invested.

What are the risks and what could I get in return?

Risk Indicator

- The summary risk indicator (SRI) is a guide to the level of risk of this fund compared to other products. It shows how likely it is that the fund will lose money because of movements in the markets or because the fund will not be able to pay.
- This fund is not guaranteed and you may therefore not receive back your original capital.
- This fund does not include any protection from the current and future market performance so you could lose some or all of your investment.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- The risk indicator may change in the future and is not guaranteed.
- The risk indicator is derived and based on a standard volatility measure of historical performance utilising a methodology defined by the PRIIPs regulation, so other factors such as illiquidity would not have been considered.
- Past performance of the funds is not necessarily a guide to future performance.
- The value of your fund can fluctuate on a daily basis, it can rise as well as fall.
- Based on the performance of the fund, you might not get back the sum you invested.
- The higher risk profile, the more likely to have more frequent and larger fluctuations.

Other Risks

All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The fund invests in fixed interest securities issued by companies which, compared to bonds issued or guaranteed by governments, are exposed to greater risk of default in the repayment of the capital provided to the company or interest payments due to the fund. The fund investments may be subject to liquidity constraints, which means that shares may trade less frequently and in small volumes, for instance smaller companies. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the last market price quoted or at a value considered to be fairest. The fund invests in fixed interest securities such as corporate or government bonds which pay a fixed or variable rate of interest (also known as the 'coupon') and behave similarly to a loan.

These securities are therefore exposed to changes in interest rates which will affect the value of any securities held. The fund(s) may invest in structured credit products such as asset backed securities ('ABS') which pool together mortgages and other debts into single or multiple series credit products which are then passed on to investors, normally in return for interest payments based on the cash flows from the underlying assets. These securities have similar characteristics to corporate bonds but carry greater risk as the details of the underlying loans is unknown, although loans with similar terms are typically packaged together. The stability of returns from ABS are not only dependent on changes in interest-rates but also changes in the repayments of the underlying loans as a result of changes in economic conditions or the circumstances of the holder of the loan. These securities can therefore be more sensitive to economic events, may be subject to severe price movements and can be more difficult and/or more expensive to sell in difficult markets. A more detailed description of risk factors that apply to this fund may be found on the fund prospectus.

Performance Scenarios

Investment 1,000 Insurance premium €0		1 year	8 years	15 years (Recommended holding period)
Survival Scenarios				
Stress scenario	What you might get back after costs Average return each year	€0 -100.00%	€6,455 -4.79%	€11,785 -3.08%
Unfavourable scenario	What you might get back after costs Average return each year	€0 -100.00%	€7,515 -1.39%	€15,441 0.36%
Moderate scenario	What you might get back after costs Average return each year	€0 -100.00%	€8,142 0.39%	€17,177 1.68%
Favourable scenario	What you might get back after costs Average return each year	€0 -100.00%	€8,829 2.19%	€19,155 3.00%
Death Scenario				
Insured event	What your beneficiaries might get back after costs	€3,500	€8,350	€17,177

- The maturity value of your policy is dependent upon the amount you invest, the investment performance of the fund and the charges deducted for establishing and administering your policy.
- This table shows the money you could get back over the next 15 years, under different scenarios, assuming that you invest €1,000 p.a.
- The above scenarios are an estimate of future performance based on past performance on how the value of this investment varies and are not an exact indicator. The actual performance of your investment might differ from the performance shown above hence you should not base your investment decision on the expectation that any of these scenarios will occur.
- What you get back will vary. It depends on how the market performs and for how long you keep the investment.
- The stress scenario show what you might get back in extreme market circumstances, and it does not take into account the situation where the Fund is not able to pay you.
- The figures do not take into account your personal tax situation, which may also affect how much you get back.
- The figures shown include the costs of this fund and the costs of the Savings Unit-Linked plan, but does not include the costs that you pay to your advisor.

What happens if the Citadel or the fund is unable to pay out?

In the event where during the term of your contract, the insurer becomes insolvent and is unable to discharge its obligations under your contract (deemed to be a long term insurance contract) you may be entitled to limited compensation under the Protection and Compensation Fund Regulations, 2003. Losses, which may result from poor investment performance, are not covered by the Protection and Compensation Scheme. If this Fund is unable to pay out, you may lose your investment allocated to this fund in the Savings Unit-Linked plan. For further information, you may contact MFSA at Triq I-Imdina, Zone 1, Central Business District, Birkirkara CBD1010 or phone on +356 2144 1155.

What are the Costs?

Cost over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the Savings Unit-Linked Plan, for three different holding periods. They include potential early exit penalties. The figures assume you invest €1,000 p.a. The figures are estimates and may change in the future.

Investment €1,000			
Scenarios	If you cash in after 1 year	If you cash in after 8 years	If you cash in after 15 years
Total costs	€1,045	€1,647	€4,483
Impact on return (RIY) per year	104.50%	4.08%	2.79%

Composition of costs

Recommended Holding Period: 15 Years

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories			
One-off costs	Entry costs	0.10%	The impact of the costs you pay when entering your investment. This does not include the costs of distribution of your product.
	Exit costs	0.00%	The impact of the costs of exiting your investment at the end of the recommended holding period.
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product which may be higher or lower depending on your chosen assets.
	Other ongoing costs	2.69%	The impact of the costs that we take each year for managing your investments and other recurring costs.
Incidental costs	Performance fees	0.00%	The impact of the performance fee (if any).
	Carried interests	0.00%	The impact of carried interests (if any).

Other relevant information

Apart from this Investment Option Document, before you enter into a contract of life insurance, you are also requested to read carefully the Savings Unit-linked Plan Key Information Document together with the Savings Unit-linked Information Document which will be given and explained to you by the product distributor. This information is also required by law to help you understand other matters which are not dealt with in this Investment Option Document. We recommend that before you decide on an investment, you obtain and read a copy of the Black Rock Euro Corporate Bond Fund Prospectus and Fund Fact Sheet by accessing the BlackRock website: www.blackrock.com/lu or it will be made available by Citadel Insurance p.l.c. upon request and free of charge.

Issued by Citadel Insurance p.l.c., Casa Borgo, 26, Market Street, Floriana FRN 1082. Company Reg. No. C21550 which is authorised under the Insurance Business Act, Cap 403, to carry on general and long term business of insurance.
